**ELECTRA MEMORIAL HOSPITAL
GROUNDBREAKING CEREMONY
JANUARY 4, 2012**

DESCRIPTION OF PROJECT

This \$11.4 million construction project will double the size of the current hospital building to create a modern health care facility with a patient-centered design.

Specific areas of the expansion and renovation project:

- Increase and expand the size of the hospital laboratory to meet regulatory requirements and to provide adequate space for critical tests and services.
- Relocate the rehabilitation services from a building adjacent to the hospital to an area within the hospital to provide more comprehensive rehabilitation services to inpatients.
- Add a new inpatient wing with modern private rooms and renovate the current patient area for other services.
- Consolidate cardiopulmonary functions into one area.
- Update mechanical, electrical and plumbing systems to meet current codes and efficiency standards.
- Enlarge space for materials management, dietary, housekeeping and laundry services.

WELCOME & RECOGNITION OF GUESTS

Jan Reed, CEO
